

Diamond Products & 1-888-OHIOCOMP Whatever it takes!

Diamond Products is a world leader in the manufacturing and distribution of diamond tools and equipment. Headquartered in Elyria, Ohio, the company has grown from a 12-person shop to a world-class operation.

The original company began manufacturing diamond bits for mining applications as the Pennsylvania Drilling Company in the 1940s. In 1964, the company changed its name to Diamond Products, and its focus to diamond core bits and drilling machines.

Today, Diamond Products manufactures and distributes a wide variety of diamond blades, bits, saws, and specialty equipment, tools, and accessories. The company's products are marketed through its sales and distribution networks in the United States, Canada, Mexico, Europe and Asia.

Diamond Products does *whatever it takes* to support what it sells by reacting instantly to customer needs, much like **1-888-OHIOCOMP's** response to a work-related injury. Gary Sauer, Health and Safety Director, and the entire Diamond Products team can depend on that same whatever-it-takes attitude from their partner and MCO – **1-888-OHIOCOMP!**
